Adding an Input Group to a ZFP config via ZTOOLS

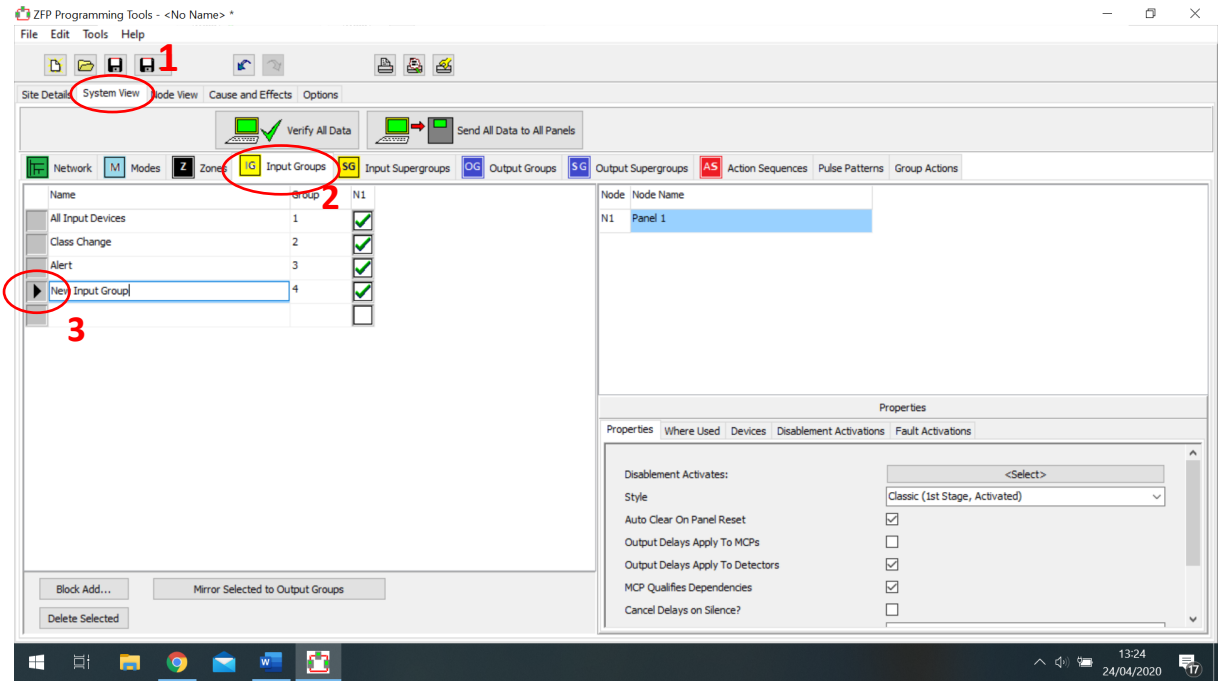
Firstly take a download from the panel using ZTOOLS. Then follow the numbered steps below for Fig 1.

1. Click on System View.

2. Click on Input Groups.

3. Click on the next available text box and add text for the new Input Group name.

Fig 1



The steps below and Fig 2 explain how to add the new Input Group to a Cause and Effect tree.

1. Click on Cause and Effects.

2. Create a new Cause and Effects tree using the New Input Group.
