

24V Polarised Fire Bell

Part No. **BF336**

Overview

- A tough durable red fire bell.
- Widely used in schools and other establishments for signalling 'class' or 'shift' changes.
- Designed for internal use only.
- 152mm (6 inch) x 60mm
- Incorporates highly efficient rotary centrifugal movements to provide a high sound output of up 95dB.
- Low current consumption.
- Includes a multi-fixing base plate.

Technical Specifications

Approvals/certifications	To EN54-3
Protocol/compatibility	Compatible with C-TEC's full range of conventional fire alarm panels.
Application/operation	Designed to be wall mounted. Indoor areas only.
Power requirements	20-28V
Nominal SPL (Sound Pressure Level)	Up to 95dB(A) at 90 degrees to front face (92dB EN54-3).
Alarm current	25mA.
Product dimensions (mm)	152mm diameter x 60mm deep.
Weight	786g.
